Introduction

A functioning social welfare system can go a long way to promote the wellbeing of vulnerable children and their families by providing myriad of quality child and family support services. These services include child protection from neglect and abuse, prevention and response schemes to address sexual and gender-based violence, early intervention, and justice administration services. Social welfare organizations in both the private and public sectors are working tirelessly to deliver the aforementioned child and family support services. These include Faith-Based and Community-Based Organizations, Non-governmental Organizations, the Ghanaian Health and Education Directorates and affiliates, the Police and various assemblies at the Metropolitan, Municipal and District levels.

The provision of this centralized directory of social welfare service providers is in line with a need, identified by Office of the Head of Local Government Service (OHLGS), the Ministry of Gender, Children and Social Protection and the Ministry of Local Government and Rural Development, to strengthen the social welfare service workforce within the framework of the Government of Ghana's Medium-Term National Development Policy Framework 2018-2021, the President's Coordinated Plan for Economic and Social Development 2017-2024 and Agenda 2030 of the Sustainable Development Goals adopted by the United Nations.

This document contains agencies and organizations that offer child and family support services in Ghana. These organizations have been grouped regionally and further categorized according to districts to make navigation through the directory very easy. The location, addresses, contact information and scope of services provided by each organization has been specified in this directory. The services provided by these agencies include health, social protection, child protection, legal and justice support, sexual and gender-based violence, mental health and psychosocial support.

Service Providers Analytics

The following is a summary of data collected across all **16** regions of the country. In all, a total of **10,348** service providers have been recorded with Ashanti Region recording the highest and the least being North East.

Categories Statistics

The table below shows the distribution of Service Providers to the various categories.

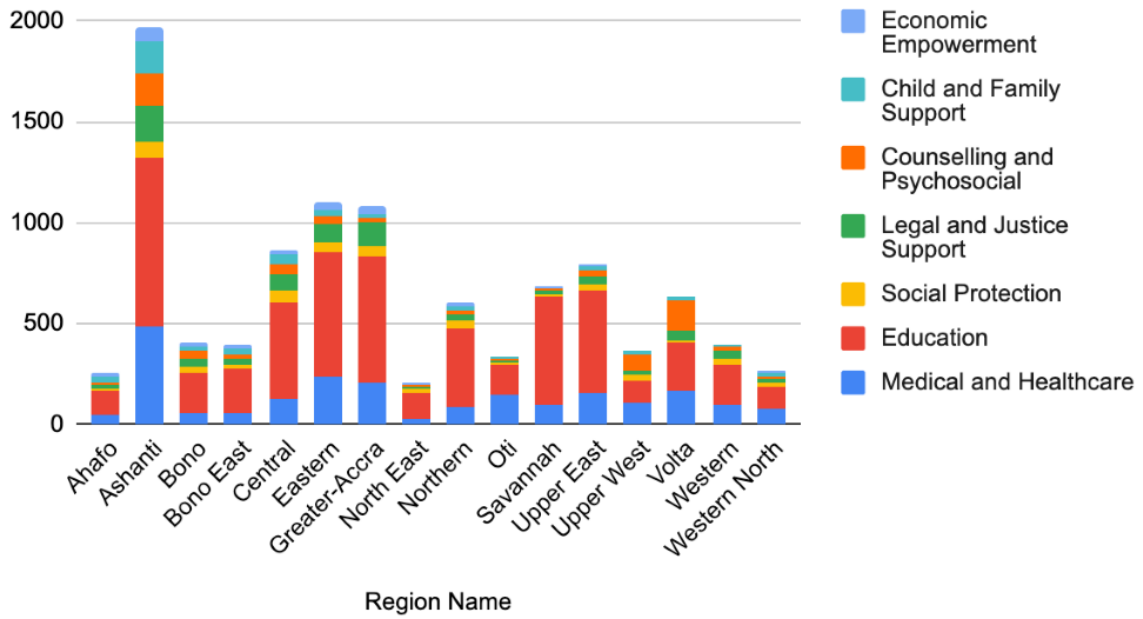

Categories	Total Service Providers
Child and Family Support	465
Counseling and Psychosocial	676
Economic Empowerment	265
